Darning mushrooms offer a large working surface and an ergonomic grip, to make mending easier and more precise. Hand-turned by David Gilbert, the mushrooms are made from various woods and polished to a smooth finish. Each is unique in shape and woodgrain, and measure approximately 3 ¼" / 8.5 cm in diameter and about 3 ½ / 9 cm in length. The hollowed underside of the cap makes a comfortable place for your hand to sit. Picture is for reference, only; because each mushroom is hand-crafted, the item you receive may differ slightly.

Each hand-crafted darning mushroom is available for \$29 USD (shipping included) to anywhere in the US. International delivery not available.
